[Nonresponsive based on revised scope]

Happy Valentine's day also

I do have some ideas to discuss with the vendor. I am busy on another site until mid-afternoon I'll give you a call when I leave here

Thanks for sending me the data. I'll talk to you soon

Chris

> Chris,
> Good morning and Happy Valentine's Day.
>
> As you saw the TCLP Cadmium level in segment 2-3 is 3.2 ppm. When we originally sent the 3 IP piles to Enviroblend for the treatability study, our highest Cadmium level was 1.88. Our ALS analysis has us in the same range, I attached the report. At this 1.88 Cd level they were able to treat to below TCLP level of 1 using a 3% of their material. As you also know we do not have any pre-mix data on the PB and Cd levels in the segments.
>
> I don't know what questions I could ask them with but will talk it out with them and ask them for their recommendations.
>
> I suspect the pre-mix Cd level was very high. I think the highest TCLP Cd result from our testing was in the 11 ppm range. [] should have that on his table?
